## Pediatric Therapy FAQs

### Would my child benefit?

Children with any of the following may benefit from therapy to promote overall growth.

- Developmental delays
- Autism spectrum disorder (ASD)
- Sensory processing disorder (SPD)
- Genetic disorders
- Learning disabilities
- Physical disabilities
- Post-surgical recovery
- Speech-language disorders
- Feeding-swallowing disorders

*Each child's needs are unique. Ochsner Children's pediatric therapists tailor services to address specific challenges.*

### Does insurance cover this therapy?

Ochsner Children's accepts most major insurance plans. This includes Medicaid, Blue Cross Blue Shield®, and TRICARE®. Contact your insurance company directly for details about your coverage.

## Our Services

### Speech Therapy

Our skilled speech-language pathologists (SLPs) diagnose and treat communication and swallowing disorders in children. They work with kids of all ages to help them develop essential skills for effective communication.

### Occupational Therapy

Our certified occupational therapists (OTs) help children develop the skills they need to join everyday activities. They focus on fine motor skills, sensory processing, self-care tasks, and social interactions to promote independence and confidence.

### Physical Therapy

Our licensed physical therapists (PTs) help kids of all ages improve movement, strength, and coordination. These therapies enhance children's physical abilities and promote mobility and independence.

## I'm interested. Where do we begin?

If you think your child may benefit from therapy, these three steps will get you started.

- 1 Request a referral** from your child's primary care physician.
- 2 Call Ochsner's Central Scheduling Office to **confirm the referral has been received**: 504-842-4348**
- 3 Our team will contact you to **schedule an initial evaluation**.**
